

Katie

We have had Katie about six weeks now. She is really a great dog. She was a year old in January so she is still into chewing and being a puppy. We provide her with many toys to play with and chew on. She was house broken when we got her and she has not had a single accident. She loves to play with other dogs and people. With people she loves fetch. She seems to never get tired. What I like most is her disposition. She loves everyone and does not have a single aggressive bone in her body with other dogs or people. The jury is still out but she may be the smartest dog that I have ever had. One of the cute things that she has learned is... I read the newspaper in the morning. If I take too long she sticks her head under the newspaper with a ball or rope in her mouth for us to play. It's tough to resist. We did change her name. We just wanted something that was easy and it seems to fit her. We feel very lucky to have her.
