SAHS Feline Plans To *Shimmy* Her Way Into Your Heart!

San Antonio, TX (March 31, 2014) – The San Antonio Humane Society has a very special 3 month old feline resident named Shimmy who was found as a stray in February. She was brought to the shelter with injuries that we speculate may have been the result of getting hit by a car. She was malnourished, suffering from trauma to her head and was experiencing nerve damage in her front right leg, causing her to drag her leg when walking. Her leg has since been amputated and she has adjusted rather well with three legs. She is also slightly nearsighted, partially deaf and the trauma to her head did affect her neurologically, as she displays a constant head bob motion.

What's absolutely great about Shimmy is that she doesn't let anything affect her awesome personality and temperament. She spent about 3 weeks in a foster home where she became friends with another kitty and discovered how much she enjoys playing with anything she can! Shimmy needs an understanding and patient family who will embrace her playful side and keep her as an indoor only kitty. She is litter box trained, eats wet food, likes living with other felines and would appreciate nothing more than to be loved. She can be a talker at times and may not realize her volume but we guarantee that she will keep her family entertained with her stories.

Shimmy is improving each and every day and as of 12pm Tuesday, April 1st, she will be available for adoption! If interested in adopting this lovely Tortoiseshell, come by the SAHS (4804 Fredericksburg Road, 78229) and watch her shimmy her way into your heart!
