

Estelle

Greetings,

My success story starts months back when my oldest daughter Alexia asked, “Can we get a cat?” Although Estelle has been living with us for a couple of weeks I say, “Months back” because it took a lot of discussion and research before choosing to adopt since we had never owned a pet as a family before.

Finally after the last approval from my husband the search for a new cat was on. The next morning when I was watching the news, I noticed a story being covered on animals for adoption. I thought to myself, “Why didn’t I think of that before?” I immediately searched the humane society website and viewed information, stories, and pictures of many animals that needed a home. It was then that I felt I had to adopt. After looking through many cat profiles we ran into a photo of a black and white cat that had a unique marking on its face. It happened to be a 6 year old female cat named Estelle. My family and I instantly knew she was the one! While my husband and children made a trip to the store to purchase all the necessary items for a cat, I made a trip to the Humane Society. I was pleased to see that Estelle was available. After Estelle and I spend some time together I filled out an adoption form and spoke to a very, very friendly and knowledgeable woman. I believe the woman that helped me was named Leslie and she was very helpful. At first I felt scared that I wasn’t going to

be able to take Estelle home since this was our first pet and we didn't have prior experience. Later during our discussion it was a great feeling to know that Estelle was going to be able to come live with us. My family and I are so happy and grateful to The Humane Society.

The Olvera Family
