

## Gertie – Update August 2011

Just a note to let you know Gertie (sky) is doing fine. It's been a year since her adoption from the shelter. She had all of her yearly boosters in July. She appears to like her vet Dr. Guerra. She does not seem to mind going. She still gets car sick, but only on distances more than a couple of miles.

She has gained some weight, but Dr. Guerra says she is okay. She loves to hang out with me in the yard. When it is cool we hand water the plants and she really enjoys that one on one time with me. She is a very good companion, and she gets along well with my other four legged children.

God Bless to all at San Antonio Humane Society,

Nonya and Gertie
