

Nala

Hello everybody my name is Nala but my mom also calls me "amores". As you can see my new home is very comfortable and I am very happy. My name used to be Riva, but my mommy liked Nala better; right now I am very happy because all I do is eat, play and sleep. My mom got me my own bed, but to be honest with you, I chose to sleep on her bed instead. She also got me many toys that I really enjoy playing with. One thing she doesn't let me do is go outside because she feels it is not safe for me. So when she goes to work, she leaves the blinds open so I can see outside. My mom was feeling a little lonely when she adopted me, and now she is feeling much happier with me at home. I am a great companion, and I make her smile with the crazy things that I do. My favorite game is to hide from her, and when she comes to find me, I like to jump and scare her; she seems to like that game because she keeps following me and looking for me. Also when she is using her computer, I like to climb on her lap, and she lets me sleep, while she works. I really love my new home. At the beginning my mom was a little scared because I got a little sick, but she took good care of me and I am much better now. She has taken me to the vet more than once because she wants to make sure that I am very healthy. I have been in my new home for almost a month now, and I am totally adapted to it. I want to thank humane society for keeping me safe, taking good care of me and most important for giving me a new home and a very nice mom. Thank you everybody.

With the most sincere appreciation,

Nala
