

Sasha

My son and I can't thank you enough for blessing us with our little Sasha! I went into the Humane Society planning to surprise my son with a puppy like I had been promising him for a while. Sasha had JUST been taken into the Humane Society an hour before my arrival. She stuck out immediately and everyone that passed by just thought she was adorable; just as I did and still do. She is our first dog in our home and we are both learning how to properly love and care for her together. She is a part of our family now and even goes with him to his father's house on the weekends. Sasha is feisty and very attached to us; she sleeps in her kennel right next to the bed. We kept her name that was given to her by the Humane Society because we liked it so much. She is slowly getting potty trained and, having been taken from her mother at such a young age, she is doing very well at learning to tell us when she has to go.

Thank you again!
Vanessa & Steven
