

Maverick

I adopted a dog named Maverick who had heart worms. He was a very mellow dog because he didn't feel well. Now he is a happy boy hyper as can be! He waits for me by the door to get home everyday. We immediately go on a walk. He has a special tree way out in the yard he prefers to use, so we talk and get some energy out on the way! He's very well mannered and loves people. I don't know his past, but I believe by the way he acted when I first got him, to now, he defiantly is happier now. A odd thing he does is when I leave, I feed him and give him water but when I come home a can of dog food is laying on my bed. Everyday. Maverick has made me more responsible and want to stay home. He's my baby!
