

Baxter

Hello! My name is Jo, on December 23rd 2011, my daughter and I entered the Humane Society to see the kitties as a gift for my granddaughter who is about to turn one yr. old on the 18th of Jan. There was a cute, spunky kitten who seemed to like the baby and likewise the baby liked him. But then we walked into the puppy house and my daughter asked to see a puppy of 2 months old named Teddy.

We went into the social room and got to know him. He was amazing with the baby and the baby just was estatic with the puppy. They seemed to get along really well, so my daughter and I talked about it, and decided to adopt the pup. She loved the breed of the dog because he is half blue heeler and half shitz su. When she was a child she was given a blue heeler dog, and they were best friends throughout her child hood, she was left with many fond memories. So she felt this dog was a perfect match and breed for what we were looking for and want in our home.

We quickly changed the pups name from Teddy to Baxter, like the dog from the Anchor Man movie, because he kinda looked like him. And ever since he has been a well recieved addition to our family, we love him and his playful puppy ways. House training him has been a challenge but it's a commitment we've made and share among the family.

We really look foward to having him in our family for many years to come and are growing to love him more and more every day.

We are very grateful for your efforts and kindness to these animals that no one wants, but that others

like us adore. We frown upon puppy mills and just don't know who to trust out there in the world when it comes to buying animals. It's cool that y'all provide the microchip but we wish you would've let us decide whether or not to neuter the dog. But I completely understand the trying to control the out of control dog population problem that there is today.

By all means, May God Bless You and Give you strength to carry on your good will missions.

Love,
Jo, Isabelle and Elle
