

Sherwin

I adopted Sherwin in March of 2013 and he has been a blessing. When we got him he was heart worm positive and I'm happy to report this month is his last pill and he starts treatment too to be heart-worm free at VCA. My son was born with a butterfly chest so at first I thought it wasn't a good idea to adopt till he was older but when we saw Sherwin we had to take him home. See before he went to the San Antonio Humane Society he was at ACS, I fostered puppies and I would go and visit the other dogs. That's where I first met him, he looked so sad but I had other fosters at home so taking him in would have overwhelmed me with pets. So in March we heard about your \$15 dollar adoption fee, I wasn't expecting to go home with a dog but I looked into the window and who do I see, I see him! I couldn't believe it, I told my husband it has to be a sign that he was meant to be with us. So I adopted him and he once had a sad face but when you see him you can see the change in his eyes, he found his home. My son adores him he's never home alone, car rides galore and lots of attention. I want to thank you for him, since we had him it has been wonderful and adopting has been rewarding I can't wait to get our next furry friend from you guys.
