

Kanga

I thought y'all would love to see this transformation! I adopted Kanga from the Humane Society when she was just 3 months old! Now she is going to be 2 years old in November! When we got her she was scared and timid. So skinny you could see every rib!

She also has a kink in her tail you could tell it had been broken at one point. She is now the most loving and hyperactive dog I have ever met! What once weighed 7 lbs now weighs a healthy 55! She still is scared of males but we are working with her. Thank you San Antonio Humane Society for bringing such an amazing dog into our lives.
