

Leighton

I just wanted to let you know how wonderful Leighton is doing since I adopted him in March 2013. Leighton was heartworm positive and had been in your shelter for quite a while. He even had two different Adoption Angels. Leighton was cleared of his heartworms shortly after adoption and is living a very healthy and happy life. He has traveled many miles with his pet parent; from San Antonio, TX to Washington state by road, and then he Leighton boarded a ferry for a trip to Alaska! Leighton enjoyed the boat ride and had fun rolling and diving in the soft fresh snow of Alaska. He now resides in Bronson, Florida with his pet parent who spoils him rotten. Leighton even stars in his own book entitled, "A Trail of Ten Thousand Smells"!

I just wanted to write and tell you that although he may have started with a strike against him in the way of heartworms, I am soooo glad you saved Leighton from the dog pound because he is truly the joy of my life.

Thank you
Connie
