

Luna

Loving this adoption update thing you guys are doing!! A year and a half ago, at 25 I adopted my first pet EVER. When we walked into the shelter, Luna (formerly Dalek) caught our attention right away with a curious gaze and lively meow. When the shelter volunteer put her in my arms for the first time, she purred like a tiny motor and I knew that I had been chosen and this was the cat for me. These days she is the queen of our apartment, waking us up every morning with her own little "serenades" and vegging with my husband and I on the couch for netflix marathons. Thank you San Antonio Humane Society, for bringing this beautiful little member of our family together with us!! We look forward to many wonderful years to come with our little furball.
