

Abby (aka Akira)

The first picture we sent to you of our Abby (renamed from Akira) was taken on 3/22/09, the day after we adopted her when she was just 4 months old. (This picture of her is actually posted on your web site as part of your Success Stories slide show.)

Adopting this puppy has been a really great decision for us and we thought you might enjoy receiving an update. Abby is now 22 months old and has turned out to be a wonderful dog! She was such a rascal until she hit that magical one-year birthday milestone, but is now a real joy. She has learned to be very obedient, but she has retained all of her personality and is quite a character! We just love her to pieces, including those Texas-sized ears, the endless tail wags and her big sloppy kisses. One thing is certain...summertime sure is hot in San Antonio and Abby has discovered a great way to beat the heat. The new photos show her enjoying the pool with us this year. She's got her own tube, life jacket and pool float...maybe we need to get her a pair of sunglasses next!

We're not sure Abby realizes that she's a dog, and we have no intentions of telling her!

Thank you for all the work you do finding homes for so many wonderful pets.

Kind regards,
Debbie and Conrad
