

Dickens

My husband and I adopted "Dickens", a Jack Russell on March 15th of this year.

Dickens is full of life and the joy of our home. He sleeps in-between my husband and I at night with his head on a pillow and his body under the blanket, if you can't tell he doesn't believe he is a dog! ha! He loves his walks and does not seem to be bothered by other dogs that pass us. Dickens is about 8 months now and is doing really well with commands. Ones that are second nature to him are "Sit" "Stay" and "Kisses". He has much energy, but enjoys his downtime to cuddle!

We were warned that it was in his nature to be very protective so we have socialized him from the very beginning. Recently my husband, who is in the military, had to go to South America for awhile, Dickens would not sleep a wink at night. He sat on the end of our bed and would bark at any little thing and also would pace back and forth as if he were guarding me. This was the first time I saw how protective he really was.

We are so fortunate to have Dickens, and can tell how much you all loved him and took care of him before he became part of our family.

Thank You
Travis and Christy
