

Jacklyn

Let me just say "Mookla" is now named "Jacklyn" and she is our pride and joy. When we first adopted "Jackie" she came down with a mild form of distemper. Our vet did not like the outcome and worried if other puppies were indeed infected. She was treated vigorously the first two weeks of adoption and thank God came out fine. She loves her toys to be blue or pink and is just a girlie girl. I had just lost my Chow "Tiger" and thought I would not connect to another dog, but here is Jackie my little girl. I have four adopted cats and she makes sure they know she rules. Kidding aside she is very sweet with her new siblings. Oh by the way "Belo" has adopted me and is a new member of our family. He is a stray black male cat and well even though he is feral I am hoping to gain his trust so I can have him fixed. As for Jackie she is fine and happy. Merry Christmas, donate to the Humane Society and best wishes for all. Love Jackie and ALL her siblings!!!
