

From Tami: Boo

"After havin my new kitty for a couple of days his personality started comin out. He plays non-stop and has takin over as the trouble maker. I never get tired of playin with him. He sleeps with me every night (and wakes me with his playin). He gets along great with my 9 year old dauschund and even gets her playin. I have changed his name from charulz to boo my halloween cat. He travels many places with me in my car. I have grown to love my boo very much and look forward to seeing him grow into a big fat lazy cat."
