

From Dave and Kelly Haught:

Gray-C

"We adopted a cat that we renamed gray-c, her old name was gaylee. She is the joy of our lives. We have always had animals and when we moved down here we left our dog with our two boys so it was fitting that we get another animal to keep us company. She is very funny because we have an old tv stand by our seats that have the two holes in the back for the cords to go thru and she will jump up on the shelves were the vcr went and she will stick her paws out the holes to get us to play with her and if we don't see her, she will look out the front at us or she will jump on us then go back down in the hole and stick here paws out the hole again. She is a very good cat and is the joy of our family. We did not know anything about her only that she was a stray. Would like to know more if you all know anything. While she was still in the HS/SPCA we were in one of the rooms and she decided to jump up on the kitty condo the only thing was that it was in the other room and all she did was run into the glass window that seperates all the rooms. We would have liked to take everyone of the pets home with us but that was not going to do anyone good, so we brought one home and she brings pleasure to this family. Thanks for letting us adopt her and give her a good home."
