

From Dustin: Hank

"My dog, Hank has really changed my life. Everyday he does new things! When I come home from school I always look forward to playing with him. I have already got him to sit, stay, lay, crawl, and I am now in the process of teaching him to roll over. Some things that are really unique about my dog is, he loves belly scratches, his favorite toys are socks, and one of his ears is always sticking up farther than the other. You guys probably wouldn't recognize him any more. And, I re-named him from his original name Freddy to Hank, as I already mentioned. There are many more things he does to change my life. All I know is I don't think I could live without him being here with me!"
