

From Gloria: Harley

"We adopted Harley, formerly Gordon, around the middle of March. When we first saw him at the shelter he was scared of his own shadow. He just shook and cried for the other dogs. We learned that he was dropped off with five litter mates so we suspected he missed them terribly. Within just a very short time after arriving at his new home with us Harley blossomed into a normal happy puppy running around all over the house. He follows my daughter and won't let her out of his site when she is home. He plays with our three cats, they aren't as happy to play with him but have "graciously" accepted him now. He's doing pretty good on potty training and I've been teaching how to fetch a ball. He is such a smart and lovable puppy. We feel blessed to have found him and we know he feels right at home with us."
