

From Bobbie & Ian: Railey

"My son and I adopted Lacey Jane from the Humane Society on 4/18/09. Just 3 days after she was dropped off for the 2nd time since she was born. She has become the best part of our family very quickly. My son and I absolutely adore her. Not only is she a people pleaser, but she is well trained. She also has her 3 phases. She protects my son and I by using her so-called, aggressive growl and bark (1). She has her playful bark to get you to throw the ball/bone (2). And she has her cry/bark when we have to go to school and work (3). She showed us the first night how much she loved us by taking ownership of my leather chair in the bedroom and watching over us at night. Basically it boils down to we trust her and she trusts us. We couldn't have made a better choice. I KNOW we are ALL happy and we thank the Humane Society for making it possible to meet and adopt our new family member."
