

From Angelica : Skelly

"After my mother passed away in December 2008, my father had a difficult time being alone. After an unsuccessful attempt to unite one of my dogs with my dad, a coworker suggested I try looking at the dogs on the SPCA Bexar County (San Antonio, Texas) website. With my dad's approval on January 30, my coworker and I went to SPCA determined to locate the dog that would provide dad with love and support, and above all, companionship. After much soul searching and praying, we decided to adopt Skelly. She had been at SPCA for 2 1/2 months after being found on the streets of San Antonio grossly emaciated and with heartworms. With much love and care, she was nursed to health by the wonderful SPCA staff and volunteers. When Joy (what my dad calls her because this is what she gives him daily) and my father first laid eyes on each other, it was instant love. Joy is the PERFECT dog! Even though she is about one year old, she patiently sits with my father and is content just to be in his presence. She has brought such Joy to his life that it seems amazing she's only been a part of the family for several weeks now. Thank you for this much needed service you provide the community!"
