Wellness Service Consent Form

Please initial to indicate you have read and agree with the statements below:

_____ I understand that The San Antonio Humane Society offers preventative services only, limited to: vaccines, heartworm testing and prevention, deworming, and nail trims.

_____ I understand that the veterinarian examining my pet will refer me to a full service veterinary clinic for ANY additional services my pet may require outside the scope of SAHS wellness clinics.

_____ I understand that the veterinarians and staff of SAHS may refuse to provide services to my pet if they feel my pet's health will be compromised, or if my pet poses a danger to itself or others.

_____ I understand that any vaccine or injection administered has a risk of causing a reaction (local or systemic) even if my pet is healthy. I understand that SAHS veterinarians and staff are not liable for vaccine reactions that may occur.

Texas Health and Safety Code 828.012. b. requires for the San Antonio Humane Society to verify and document the following information for our veterinarians to provide services to the general public.

I certify that I qualify for wellness services according the following criteria: (Please check all that apply)

- I receive government assistance.
- My gross annual household income is less than \$21,000.
- I am otherwise unable to afford preventative veterinary services for my pet.

Please see **your regular veterinarian** for the following concerns:

*****Packages are not available for substitution or exchanges. All combinations are available "as is" only.
All samples are while supplies last.*****

Puppy/Kitten Packages:

Puppies over the age of 15 weeks are NOT eligible for these packages. Boosters recommended every 3-4 weeks until 3 total vaccines are completed. We recommend all large breed puppies be vaccinated every 3-4 weeks until 6 months of age.

Litter discounts are only applicable for pets of the same age in the same litter and more than 1 pet is present.

Booster packages ONLY available for animals who received their previous vaccine(s) in appropriate time frame (3-4 weeks) with SAHS (MUST have records present at visit)

Vaccine Reactions

Every vaccine stimulates the immune system-that is the way vaccines are designed, and why they are effective. Sometimes, vaccines "over stimulate" the immune system, or the body overreacts to the vaccine or components in the vaccine. This overstimulation can cause a vaccine reaction. The veterinarians at SAHS would like you to know what to expect after your pet gets a vaccine.

Common-Normal response to vaccines (symptoms should only last 24-48 hours):

Low- grade fever less than 103 degrees Fahrenheit

Lethargy / Sleepiness

Mild soreness at the sight where vaccine was administered, or general soreness

If any of these symptoms occur more than 48 hours, please see your primary care veterinarian.

Occasional-Mild to moderate vaccine reaction symptoms (happen in the first 24 hours after a vaccine):

Facial swelling or hives on the body

Vomiting and/or diarrhea

Severe Lethargy

Abnormal discomfort

Uncommon to Rare-Severe vaccine reaction symptoms (happen immediately after vaccine):

Collapse

Shock

Difficulty breathing

If your pet has previously had a severe reaction to a vaccine, **YOU MUST HAVE YOUR PET VACCINATED AT A FULL SERVICE CLINIC. WE ARE NOT EQUIPPED TO TREAT SEVERE VACCINE REACTIONS.**

Our wellness clinics are designed to provide streamlined service for healthy pets in need of their regular immunizations. A pet with a vaccine reaction history require special attention in the form of observation in a veterinary hospital and pre-treatment with medications prior to being vaccinated. If your pet has a severe reaction, our veterinarians are legally authorized to provide BASIC LIFE SUPPORT TREATMENT ONLY. Your primary care veterinarian must administer any additional care at a full service veterinary clinic.

HEARTWORMS are spread by MOSQUITOES!!! It is essential to keep your dog on monthly HEART-WORM PREVENTION to prevent this deadly disease!

Give MONTHLY heartworm, flea, and tick prevention for the best health of your pet!!

Please spay and neuter your pets.
