

SUCCESS STORIES!

“ After my gentle rubbing and playing with her last night, on her own, she cuddled on my old socks that I was wearing. I had developed a style of human "Feline grooming" (gently pinching hair in a cat grooming style, starting at the head and gently moving around her body).”

“ **Mya**, took to it immediately. Closed her eyes and purred herself into cat calmness.

So far, in a few hours, I found her cautious at the beginning of our friendship. Now, she's a little bit like a small puppy.

She goes off to explore and then returns to hover around me. Thanks for the opportunity to bring someone new into my life.
