

SUCCESS

STORIES!

“

I've only had her a month now but it sounds like she's had a wild year. **Dodi** is now **Darla** and we live in Guelph, Ontario. She was found by animal control in San Antonio in October and had a severe injury to her hips and one of her hind legs at the time. She ended up having her right hind leg amputated in January 2022.”

“

However, she is doing amazing on three legs! She runs faster than most of the small 4-legged dogs I know! Here are a couple pictures of her living her best life in Canada! It will be interesting to see how she does with the snow in the winter! Thanks again for your help!”
