Stories!

"We wanted to first thank you for bringing such a wonderful and beautiful soul/dog into our lives back in 2013. He has s an American Cocker Spaniel that you aged at about 6 years old back in 2013. We named him Buster. We adopted him on November 20, 2013. Buster is now 15 years old. Over the years he unfortunately dealt with serious skin issues and ear infections. We took him to numerous vets, tried meds, dogfood changes, shampoos, etc. Nothing really worked for long. He took it in stride. We loved him up. Last year, his right elbow started swelling and did do quickly. We took him to the vet, and then another vet, test was done. His heartbeat is very slow and he has a heart murmur. The blood work results indicates cancer. The right elbow is so swollen, even up under his leg in the armpit, it is the size if a softball or bigger. The skin is tearing and he bleeds. The vets say they cannot remove the tumor because there is no skin to close the wound. Also, they suggest leg amputation, but with his heart problems, he may not survive anesthesia and/or surgery to remove the leg.

“

So, we are at a very sad place. We are in a very sad position. We love our Buster beyond words. But we cannot afford surgery and chemotherapy. So we do not want our Buster to suffer and have scheduled him to cross the rainbow bridge next week. He will be cremated and will obtain his ashes and place him back into his home with those who will love and remember him always. Attached are a couple of pics of Buster. The one in the green hat was taken when he won a spa day in 2018 for St Patrick's Day. He loved it! The other is a recent pic on Valentine's Day 2023. We were definitely blessed to find Buster in 2013. I had lost my dad in 2012, along with his two dogs and I was still grieving, until Buster came into our lives. We hope to buy a memorial item in the future to honor Buster. – Katherine, Brian, Kassandra, Serenity, Papi (Chihuahua and Buster's buddy.”
