"She is fitting in well already playing with toys. We also set up a monthly donation to be a guardian. We put it under our business name as patriot dryer vent cleaning. We are so excited to partner with your organization further. If you have someone that I should talk to you, please let me know.

It's interesting that you ask. The short answer is one of your staff I wish I remember her name told us all about her once we described what we were looking for. We had seen some social media posts about the Humane Society and figured we would make that our first stop on our search. We wanted to adopt an older dog and make his or her life as special as we could make it. We understand that most people are more attracted to younger dogs and puppies. We made the commitment as a couple to adopt a mature dog and make them into the king or queen of our home. She is more than we had ever hoped for."

“ Update on princess, peaches or her name is actually Grace. We live near a golf course and she discovered the happiness of running free and chasing her tail and doing Zumiez in the grass. Lots of new smells for her. She appears to be quite happy.

Grace update. Doing great! Enjoying walks on the golf course, zooming around the house, and sneaking up on our bed in the middle of the night. She seems quite happy. She even protects us from the squirrels in the back yard.
