Stories!

” Hello! We adopted Kim a few days ago and we love her!! She loves chewing on stuffies and sometimes maybe people’s pants but other than that she is amazing. The first night Kim was crying all night and hated being alone but as time went on she is getting there!! Kim loves people and is very playful as we all love!

“ Kim loves chewing on random items such as socks, pants, shoes, plastic, cardboard, and many others like that too!! We love her very much and I thought we weren't gonna be able to be with her any longer as she’s causing us stress but that was just the beginning so now she’s a lot different and there are no regrets on that 250\$!!! Thank you, we hope to adopt there again!!”
