

FERAL CAT INFORMATION

The San Antonio Humane Society offers feral cat surgeries on a first-come, first-served basis Monday - Friday with check-in beginning at 7:15am. Please review the information below on payment, trap requirements, and procedures. *If you have not attended a feral cat trapping training class, please do not attempt to trap feral cats on your own or bring them in an inappropriate carrier. This only creates added stress to the cat, and we will not be able to perform surgery.* For any additional questions, please contact us by emailing spayneuter@SAhumane.org.

PAYMENT

- SAFCC Grant: available only for those who have attended the in-person or online SAFCC TNR class! It costs **\$25 and includes:**
 - Spay/neuter surgery
 - Rabies & FVRCP vaccine
 - Ear-tip
- Zipcode Grant is available depending on your zip code/location. It is **FREE and includes:**
 - Spay/neuter surgery
 - Rabies & FVRCP vaccine
 - Ear-tip

TRAPS

- **Trucatch Trap is the only accepted trap.**
- Rentals: 10 days for \$17 with a \$113 deposit (refunded upon return of the trap).
- Must be secured with either pipe cleaners or carabiners. **Zip ties will not be accepted!**
- Secure traps with pipe cleaners or carabiners and label (piece of tape with feral's given first name and trapper's last name on both towel/cover and top of trap near handle)

PROCEDURE

- Normally, we accept up to 17 feral cats for surgery intake daily (10 public Monday-Friday starting at 7:00am, and 7 ACS appointments from Tuesday-Friday starting at 7:00am).
- **It is recommended to arrive prior to 7:00am** since there is no way to predict how many people with feral cats will show up.
- Please **no bed sheets or extra large/long pieces of fabric** that can get tangled or stuck.
- Once inside the building, please **place your cat on the appropriate spot marked on the floor**. Our staff will check your paperwork, cat, trap, and take payment before giving a pick-up time (normally 4:30, no later than 5:00 pm or there will be a late fee).
- All feral cats will receive a permanent green tattoo on their abdomen as well as an ear tip to designate sterilized status.
- Please be aware that feral cat surgeries are normally the last surgeries done by our staff. **If you arrive at 4:30 and your cat is not ready yet, please alert staff so we can check to see if your cat is still recovering from surgery.**
- If paperwork hasn't been given to you yet, please ask staff their progress on it. If you have to leave, **we can always send it in an email same day. We can also look at surgery paperwork and let you know if your cat was pregnant or had any additional notes to look out for.**
